Enrich the Soil

Year by year the natural fertility of the soil is taken away by growing crops. This natural fertility can only be restored by feeding nature's plant food made of animal substances. Essex Fertilizers give this plant food in available forms—BONE, BLOOD and MEAT and high-grade chemicals. They restore the natural fertility to the soil and produce abundant yields. BONE, BLOOD and MEAT Fertilizers act quickly. They are fine and run freely through fertilizer drills or planters. Due to the lack of potash this year, reliable manufacturers have either been compelled to charge exorbitant prices for potash or to make fertilizers without it. Essex High-Grade Fertilizers have always grown profitable crops. We made extensive experiments without potash and now offer you Essex Animal Fertilizers that will permanently enrich your soil. Ask your local dealer about them or write the

ESSEX FERTILIZER CO., Boston, Mass.

No, Philburt, I am not a-arguing with you.
I'm just a-telling you

—when you want a real smoke, get behind a pipeful of Tuxedo and watch all the big and little Worries that have been a-besieging you, evacuate their trenches and make a rushin' advance to the rear. Those fragrant whiffs of "Tux" make them feel too joyful—no self-respecting Worries can stand for that.

FRITZ KREISLER
